

# Database Access

If you need a database for your project...

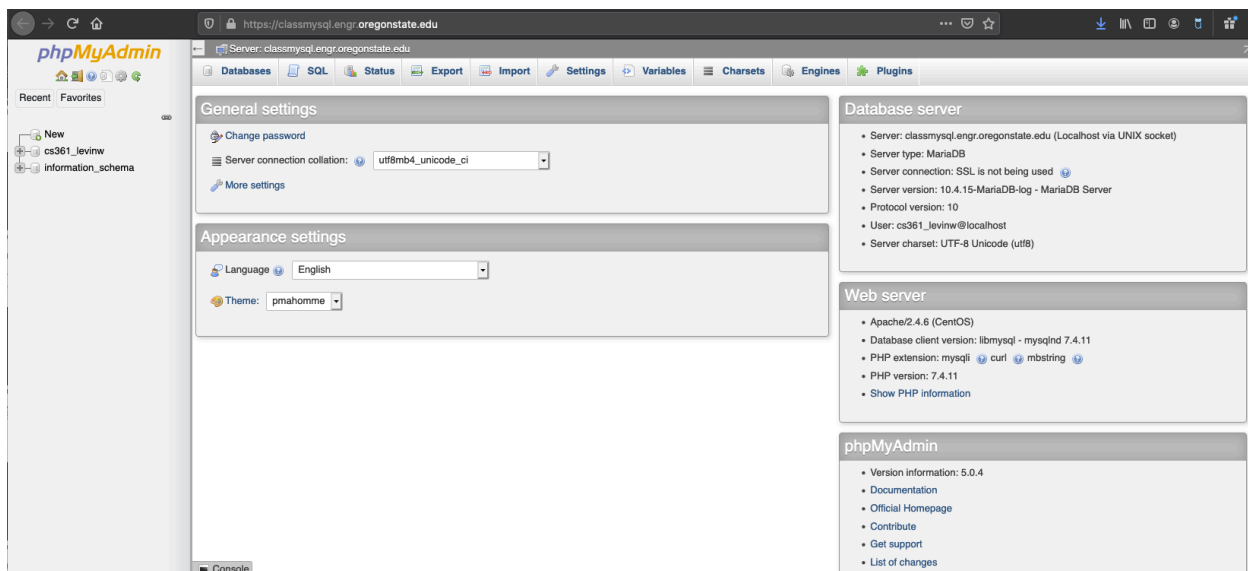

Use the instruction below to access the OSU-hosted MySQL database you can use this term.

## Access via Browser

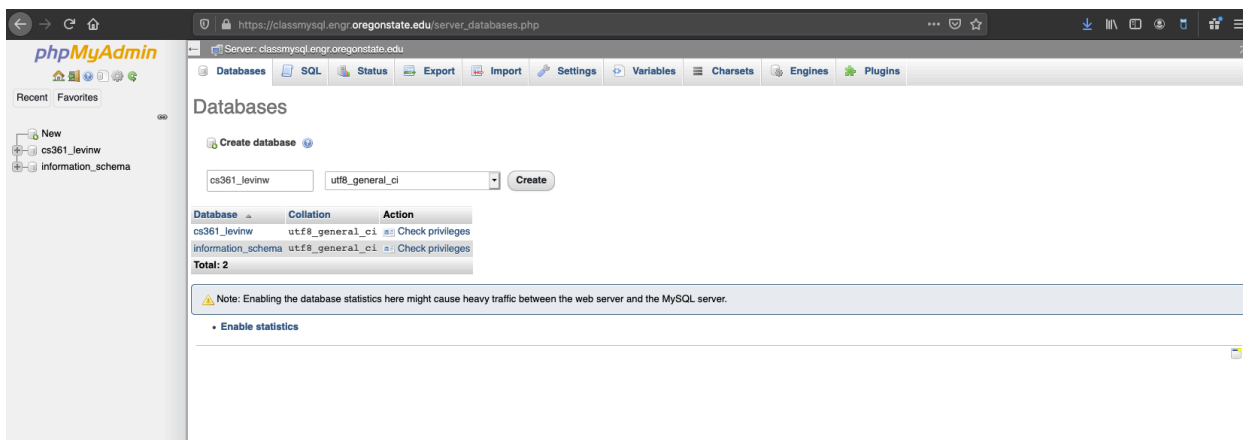

You **must be on the OSU network** to access the DB. Connect to the [OSU VPN \(Links to an external site.\)](#). Then, you can use the following credentials to access your database.

- Username is: cs361\_<your ONID username>
- Default password is: last 4 digits of your OSU ID number
- Database host name is: classmysql.engr.oregonstate.edu
- Web access: <https://classmysql.engr.oregonstate.edu> (Links to an external site.) (select classmysql as the server)

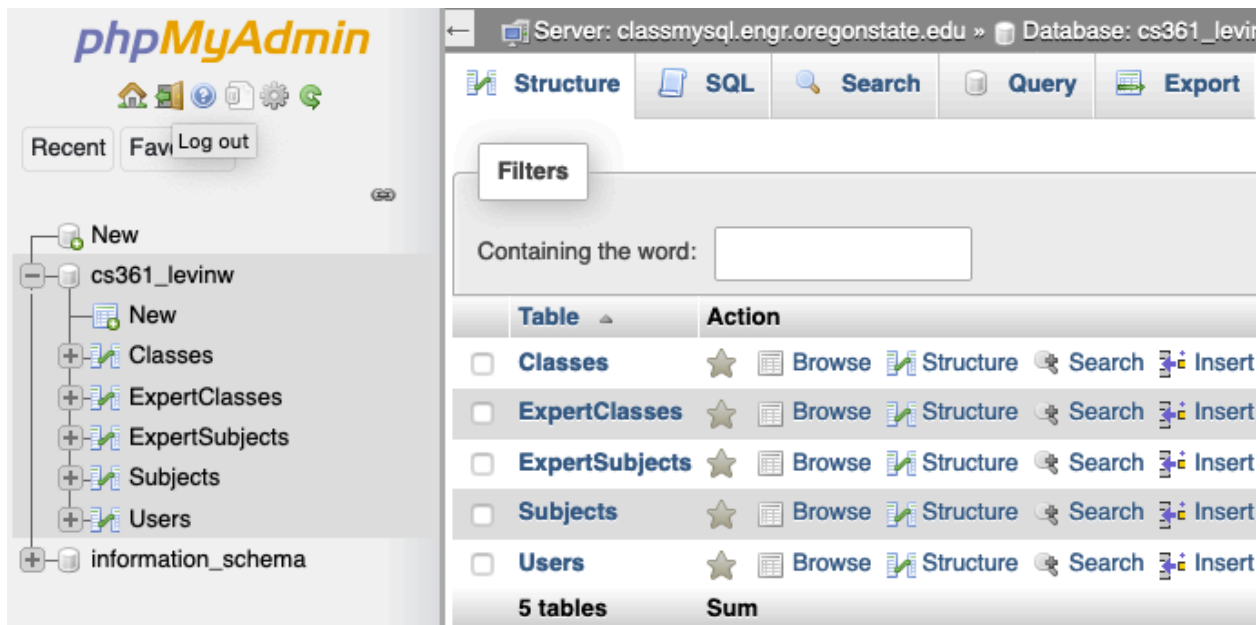

1. Login
2. Select Databases at the top

3. Select the cs361\_<Your Username>

- Now select the SQL Tab at the top

- In the SQL Box that comes up, copy and paste the contents of the create database sql file.
- Hit go in the lower right corner
